

The Drip Irrigation Conversion Kit

The customer will receive a numbered voucher that they will be able to redeem at a local irrigation supply store for a drip irrigation retrofit kit. The kit will include a pop-up spray head conversion kit, 10 pop-up spray head caps, 100 ft of 1/2" drip tubing, 100 ft of 1/4" drip tubing, 50 one gallon per hour drip emitters, two 1/2" end caps, one bag of 1/4" connectors, 1 bag of "goof plugs" and 50 landscape staples and some misc. fittings. The City and the irrigation supplier will track the voucher to eliminate the possibility of duplication. Commercial and multi-family residential customers will not be eligible for irrigation supplies as this will be cost prohibitive to the City.
